383	260	325	968

Based on a unique venture between EDGE10 and the Meghalaya State Olympic Association (MSOA), a mass talent identification program was conducted in Meghalaya by Olympians and international coaches to identify sporting stars of the future.

Through EDGE10's ARMS Physical Testing (ARMS PT) program, 4541 participants across twelve districts of Meghalaya were tested. Over 24,000, tests were conducted between 9th - 29th July, 2022. This report currently contains 4261 athletes (1,640 females and 2,619 males) and 23,335 conducted tests*.

The physical tests, namely, 20m Sprint, 10m Ladder Run, Compass Drill and Combined Vertical jump were designed to assess the athletic ability of the youth population and identify the presence of any natural talent in the state of Meghalaya.

The following sections of the report provide a detailed overview of physical assessment results along with age-specific results in both male and female categories. Highlights included

- Darie Laldusonga (16 year old female) from East Khasi Hills produced 3.19 secs in 20m Sprint with 64.8 cm Combined Vertical Jump, 2.47 secs in 10m Ladder Run, 8.33 secs in Compass Drill.
- Puroshatom Hajong (12 year old male) from South West Garo Hills, produced 3.08 secs in 20m Sprint, 61.1 cm Combined Vertical Jump, 2.47 secs in 10m Ladder Run and 8.57 secs in Compass Drill.

Such results demonstrate superior athletic capability matching those of international standards.

Above are only a few select examples demonstrating the presence of international level athletic capability in the state of Meghalaya. It is worth noting, that many of the participants performed the tests in bare feet and often without training kits. Additionally, participants were challenged by substandard testing venues in most cases (which would have impacted their performance), with the exception of Shillong, Tura and Resubelpara.

*Note: Reason why participants in report are less than total participants is because there are athletes with missing DOB and gender information which needs to be provided in order to be incorporated.

TESTS CONDUCTED
8,415

Note: Table below defines the Top 100 female participants tested, and ranked based on cumulative performance across all 4 tests. Ranking is based on a relative calculation which takes into account average performance for a test and how any given participant compares to that average. Conditionally formatted values, showcases what percentile a participant falls under for a given test.

Participants 13 years or younger	Top 1 %	Top 5 %	Top 10 %	Outside Of Top 10 %

20 METRE SPRINT - TEST OVERVIEW

20m Sprint test results presented for 3,647 participants, 1,396 females and 2,251 males across 12 districts.

The international benchmark for 20m Sprint for female is 3.50 secs and 3.00 secs for male.

38 female participants across 8 districts (SWGH, EKH, WKH, EGH, RI-BHOI, EJH, SGH, WJH) produced times quicker than the above benchmark. Chipanio Sangma from SWGH recorded the fastest time of 3.05 secs.

14 male participants across 5 districts (SWGH, EKH, EWKH, WKH, WGH) produced quicker times than the male benchmark. Raksan Sangma from SWGH recorded the fastest time of 2.84 secs.

COMBINE VERTICAL JUMP - TEST OVERVIEW

Combine Vertical Jump test results presented for 3,705 participants, 1,429 females and 2,276 males across 12 districts.

Benchmark for Combined Vertical Jump test for female was placed at 50 cm and 60 cm for males. A combine vertical jump (CVJ) test is a type of vertical jump test that use a smart logic to derive jump heights similar to what one would achieve with a yardstick type test.

29 female participants across 9 districts (EKH, WKH, SWGH, NGH, SGH, WGH, RI-BHOI, WJH, SWKH) recorded a jump height above the female benchmark. Darie Laldusonga from EKH reported the highest jump height of 64.80 cm

172 male participants recorded a combined vertical jump height above the male benchmark. Lambert Wahlang from WKH reported the highest jump height of 78.3cm

COMPASS DRILL - TEST OVERVIEW

Compass Drill test results presented for 3,865 participants, 1,475 females and 2,390 males across 12 districts.

Benchmark for Compass Drill test for female is 9 secs and 8 secs for males.

53 female participants across 11 districts (EKH, WKH, WJH, WGH, SWGH, EWKH, EGH, RI-BHOI, EJH, SWKH, SGH) produced quicker times than the female benchmark. Viviana Pariat from EKH recorded the fastest time of 7.77 secs.

75 male participants across 11 districts (EKH, WKH, WJH, WGH, SWGH, EWKH, EGH, RI-BHOI, EJH, SWKH, SGH) produced quicker times than the male benchmark. Calvin Ramsiej from EKH recorded the fastest time of 6.92 secs.

PHASE I - CONCLUSION

The results of the mass talent ID program demonstrates the value to identify and nurture talent from a young age to produce potential future Olympians.

Our findings suggest the presence of exceptional raw talent in the state of Meghalaya where many of the participants (aged below 13), yet to achieve their maximum potential, however, are on par with international standards. Moreover, young adults (aged 15 - 17) demonstrated international standards with superelite-like characteristics. Additionally, due to adverse conditions, performance of the participants would have been potentially impacted. For instance, a 17 year old male, Raksan Sangma with a 20m sprint time of 2.84 could potentially be a sub 2.80 time.

In the upcoming Phase 2, the ARMS PT team along with MSOA, will continue to work towards nurturing the identified talent pool, conduct block level testing and further assist with maximising the sporting ecosystem of Meghalaya through various ARMS PT online and live testing programs and the expansion of Elite Pathway and Coach Knowledge Transfer Program.
